

ALPINOLS The Essential CBD & Aloe Face Cream

ALPINOLS The Essential is a unique combination of our Swiss hemp extract & aloe vera which naturally cares for the skin and works against harmful environmental influences such as UV light, fine dust or stress. We have combined the active ingredients of both plants with moisturising sodium hyaluronate, to stimulate collagen production, and vitamin E for radiant skin. The face cream has a regenerative effect overnight and protects during the day.

Directions of use

Apply AM and PM to cleansed face and décolleté after serums.

A moisture for the skin

Sodium hyaluronate is a derivative of hyaluronic acid and more specifically, it is a salt form of hyaluronic acid. In contrast to hyaluronic acid it has a lower molecular weight which allows it to penetrate into deeper layers of the skin. This ingredient doesn't only moisturises the skin but it can also plump the skin by reducing the look of wrinkles and making the skin look younger.

Our formula

It was created to provide an immediate and lasting effect to meet skincare needs in today's stressful environment. We combined two powerful natural active ingredients, aloe vera and our full spectrum hemp extract, into a powerhouse synergy rich in vitamins and antioxidants for high-performance products.
