

ALPINOLS Zero

Broad spectrum CBD oil

From the therapeutic power of the plant, THC free

All the important cannabinoids, flavonoids and terpenes of the hemp plant are retained except THC. Someone could also call ALPINOLS Zero as a full spectrum without THC.

From 5 to 25% CBD concentration

Why does gentle CO₂ extraction matter?

Due to our long-standing know-how in organic cultivation, production and development as well as the use of state-of-the-art technologies, we are able to maintain the full potential of the hemp plant's benefits throughout the entire production process. For our broad spectrum extract, we remove THC by flash chromatography, preserving all active plant ingredients that are healthy for the organism, such as cannabinoids, terpenes and aromatic compounds.

How do we assure our quality?

We guarantee transparency and consistency in our product ingredients. Every production batch is subject to a detailed analysis in our in-house laboratory. Simultaneously we send the same batch to an independent accredited laboratory which performs a high precision, high accuracy and in compliance with good laboratory practice analysis.

ALPINOLS Zero

- Broad spectrum hemp extract from organic agriculture, organic sunflower seed oil
- Made in Switzerland according to Bio Suisse guidelines
- Flavour: strong and slightly bitter
