Swiss Organic Partners *at a glance*

We are one of the leading pharmaceutical and consumer cannabis products companies in Europe. Based in Switzerland, we develop and distribute high-quality cannabinoid products for the pharmaceutical and well-being markets. We strive to improve lives by harnessing nature's secret ingredients and making the highest quality, Swiss-grown, organic cannabinoid products available to everyone. We see ourselves as a partner for all companies with the highest quality and service requirements.

Well-being Division

We develop and distribute cannabinoid products for the well-being and consumer goods markets. Our products are made in Switzerland according to the strictest organic guidelines. We sell them in bulk, as a white label, and as our own ALPINOLS brand.

Pharma Division

We improve patients' quality of life through evidence-based, innovative treatments with cannabinoids. We help unleash the therapeutic potential of cannabis. We focus on the therapeutic areas of oncology, central nervous system, and pain.

” We founded Swiss Organic Partners with a simple goal in mind: to improve lives with nature's secret ingredients and make the highest quality organic CBD products available to everyone.

Matteo, Co-Founder & CEO

The love of nature *is what drives us*

Having grown up in the alpine landscapes, we strive to improve lives with nature's secret ingredients. Our farming and production of this power plant is unique. With our careful farming and production of cannabis, we ensure the highest quality of our organic CBD products. Having over 15 years of cannabis cultivation experience and over 25 years in organic farming, we've learned that plants are very similar to people. The more love and care they get, the better they grow. That's why we harvest every leaf by hand, don't use any foreign substances, and analyze our products in-house and with an independent laboratory—to guarantee consistency, transparency and the highest quality.

Our Pharma Division

Swiss Alpinopharma GmbH

Swiss Alpinopharma GmbH develops and sells cannabinoid products for the pharmaceutical market. We use our own studies to create evidence supporting the value of cannabis in medicine. We focus on the most relevant, fastest growing therapeutic areas such as oncology, central nervous system, and pain. Together with the leading physicians, we develop personalized treatment options and digitize the patient journey.

Research & development

We create evidence to support the value of cannabinoid products through studies in various therapeutic areas, such as a multi-center study in oncology.

eHealth Platform

We connect patients with doctors and want to simplify the patient journey and the prescription of cannabis products through digitization.

Product portfolio

We offer a broad product portfolio tailored to patients, with extracts and flowers as well as innovative dosage forms.

SWISS
ALPINO
PHARMA

Your partner & supplier for 100% Swiss Made organic cannabinoid products

We offer a wide range of products and a high level of customer service:

Alpinols Wholesale

White- & Private-Label Services

Bulk Products

Alpinols Wholesale

A strong brand for retailers

Natural **Health products**

ALPINOLS stands for effective, natural and innovative cannabinoid products. Our quality products drawing on the full power of the hemp plant are made exclusively in Switzerland according to the highest organic standards.

We'll support you

We won't leave you hanging! In addition to product consulting, we provide training materials and training for your sales and distribution team. We also offer extensive marketing materials and point-of-sale promotions to help you present your products in the best way possible.

POS & marketing materials

International logistics

Low minimum order quantity

Sales training

Strong brand for retailers

With ALPINOLS, retailers will get an established, well-known, unique brand of organic CBD products that aims to improve the well-being and health of people worldwide. The wide range of products is constantly being expanded with innovations.

Local presence throughout **Europe**

Thanks to our international presence with local sales staff, you will be taken good care of. With our warehouses in Switzerland and the EU, we can deliver to your desired address throughout Europe within 2-3 days—reliably and on time.

Private-Label

Your own product formulation

You'll find everything you need to grow your business. We're happy to offer customized solutions and create special cannabinoid formulations for your brand. Thanks to our many years of experience and the wide range of products, we can tailor products to your needs. We'll support you with product development, advise you on formulations, and help you create designs and packaging.

Various cannabinoids

Choose from Full-Spectrum extracts, THC-free Broad-Spectrum extracts, CBG extracts, CBD isolates, and other cannabinoids.

CPNP cosmetic products registration

We'll support you with the registration of the products in the European cosmetic products database, and in other legal aspects.

Your unique products

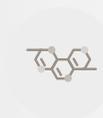

We can enrich your oils with additional vitamins and herbal extracts such as turmeric, lemon balm, black cumin, and many other plants.

Packaging & labeling

We offer the complete service—from bottling to packaging and labeling.

High-quality organic hemp extracts

We offer a wide range of premium Swiss Made organic hemp extracts and cannabinoids for various industries. Thanks to our many years of experience in the supply and development of various high-quality cannabinoid products, we have customized solutions for different industries, such as the cosmetics or food industry.

Full-Spectrum oils

We offer different types of Full-Spectrum extracts with the full spectrum of all naturally occurring cannabinoids and terpenes.

Isolates

We offer a wide variety of cannabinoid isolates (CBD, CBG, CBN, etc.) of the highest purity, free of impurities, and in different variations.

Broad-Spectrum oils

Thanks to THC extraction using flash chromatography, we offer high-quality Broad-Spectrum extracts and distillates.

CBD & CBG flowers

Choose from a wide range of Swiss-made flowers with THC < 0.2%.

Individual formulations

Highest quality

Our organic CBD oils

*Grown, extracted,
manufactured, and bottled
in Switzerland*

Large selection of white-label products and individual product formulations.

Full-Spectrum oils

With all natural cannabinoids and components of the hemp plant.

THC-free oils

Broad-Spectrum extracts with no THC and high-quality terpene profile.

Micellar extracts

Water-soluble drops with micellar extracts for maximum bioavailability.

Oils for pets

Various CBD oils specifically designed for cats, dogs, and other pets.

Your formulation

Create your own cannabinoid formulas with additional botanicals and ingredients.

Full-Spectrum oils *with different carrier oils*

With this extract, we draw on the full power of the plant. This CBD oil contains all of the important components of the hemp plant, including the legal amount of THC. We offer several options and variations with Full-Spectrum hemp extracts.

- » Choose your desired carrier oil: organic sunflower seed oil, organic MCT coconut oil, organic hemp seed oil, and many more on request.
- » Choose the content and bottle size: 10 ml, 30 ml, other sizes on request
- » Choose your desired CBD concentration: 3% to 40%

CBD content	Bottle size
5% (500 mg)	10 / 30 ml
10% (1,000 mg)	10 / 30 ml
15% (1,500 mg)	10 / 30 ml
20% (2,000 mg)	10 / 30 ml
25% (2,500 mg)	10 / 30 ml
40% (4,000 mg)	10 / 30 ml

Why is the entourage effect important?

In cannabis science, the entourage effect is the synergistic interaction of cannabinoids, flavonoids, terpenes, and fatty acids. These occur naturally in cannabis and lead to better therapeutic effects. To ensure the entourage effect and associated health benefits, we only make full- and broad-spectrum CBD oils. Our Full-Spectrum oil is characterized by a low THC content—below 0.2% in the EU and below 1% in Switzerland.

100% natural thanks to Bio Suisse farmers

Bio Suisse is the highest and the strictest standard for organic, sustainable farming in Switzerland. We believe hemp is like wine. The quality of the soil is reflected in the end product. Our fields have been certified organic for 25 years, and our organic farmers are aware of their responsibility towards natural resources. We guarantee that our products are free from any chemicals, pesticides, and herbicides.

THC-free oils

with Broad-Spectrum extracts

The Broad-Spectrum extract is a THC-free product that contains all other cannabinoids and all terpenes. You could call it a Full-Spectrum extract without THC. Here, too, we offer different options and variations.

- » Choose your desired carrier oil: organic sunflower seed oil, organic MCT coconut oil, organic hemp seed oil, and many more on request.
- » Choose the content and bottle size: 10 ml, 30 ml, other sizes on request
- » Choose your desired CBD concentration: 3% to 25%

CBD content	Bottle size
5% (500 mg)	10 / 30 ml
10% (1,000 mg)	10 / 30 ml
15% (1,500 mg)	10 / 30 ml
20% (2,000 mg)	10 / 30 ml
25% (2,500 mg)	10 / 30 ml

CO₂ extraction for the highest quality requirements

Our many years of experience in organic farming, production and development, and the use of modern technologies help us realize the full potential of the hemp plant. That's how we can preserve the health benefits throughout the manufacturing process. For our Broad-Spectrum extract, we remove the THC using flash chromatography. This technology allows preserving all plant substances that are important for our body, such as cannabinoids, terpenes, and aromas.

Quality thanks to strict quality control

We guarantee transparency and consistency in our products' ingredients. Each production batch is subject to a detailed analysis in our in-house laboratory. At the same time, we send the same batch to an independent accredited laboratory that carries out a highly precise, highly accurate analysis in accordance with good laboratory practice.

Micellar extracts

Water-soluble CBD for higher bioavailability

Using a technology patented in Switzerland, we make our hemp extracts water-soluble and more bioavailable by encapsulating the ingredients— and all this with 100% natural ingredients and without any synthetic or synthetically modified components.

Cannabidiol		WL Intl. 10 ml
1.75% (175 mg)	With Full-Spectrum extract (THC < 0.2%)	A000314
2.5% (250 mg)	With Broad-Spectrum extract (THC-free)	A000313
0.9% (90 mg)	With curcuminoids + vitamin C (Full Spectrum)	A000315
1.25% (125 mg)	With curcuminoids + vitamin E + vitamin D (Broad Spectrum)	A000495
1.25% (125 mg)	With curcuma oleoresin + olibanum extract + vitamin C	A000315

Higher bioavailability and greater effectiveness

Bioavailability defines the extent and speed with which an active ingredient enters the bloodstream. With conventional oils, this only happens to a limited extent, with studies citing values of 10-20%. With ALPINOLS Aqua, the values are at 90%. Our Full-Spectrum extract is based on a patented micelle technology. The oily particles are coated with a fine coating. The coating combines with fat on the inside and water on the outside. The ingenious side effect: protected in this way, the active ingredients enter the body—directly and easily.

How does it work?

The human body naturally produces the micelles to digest fat. This process is time-consuming and requires a lot of energy. That's why most active ingredients can't be absorbed. With the help of micelle technology used in our product, the fat-soluble substances are encased in a water-soluble shell. This unique and patented process gives the cannabis Full-Spectrum extract maximum bioavailability. The body can absorb and process the hardly soluble substances directly.

Oils for pets

CBD oil, salmon oil & SOS spray

Our Pets CBD products are specifically designed to meet the needs of dogs and cats. The SOS spray for stressful situations and the salmon-flavored CBD oil complement our classic CBD oils for pets. The application depends on the pet's size. The CBD oils are intended for regular use (including with food) while the SOS spray is meant for emergencies.

CBD content	WL 10 ml
3% (300 mg) terpene-free	A000292
6% (600 mg)	A000309
12% (1,200 mg)	A000265
3% (300 mg) with salmon oil	A000290
6% (600 mg) with salmon oil	A000308
2.5% SOS spray	A000538

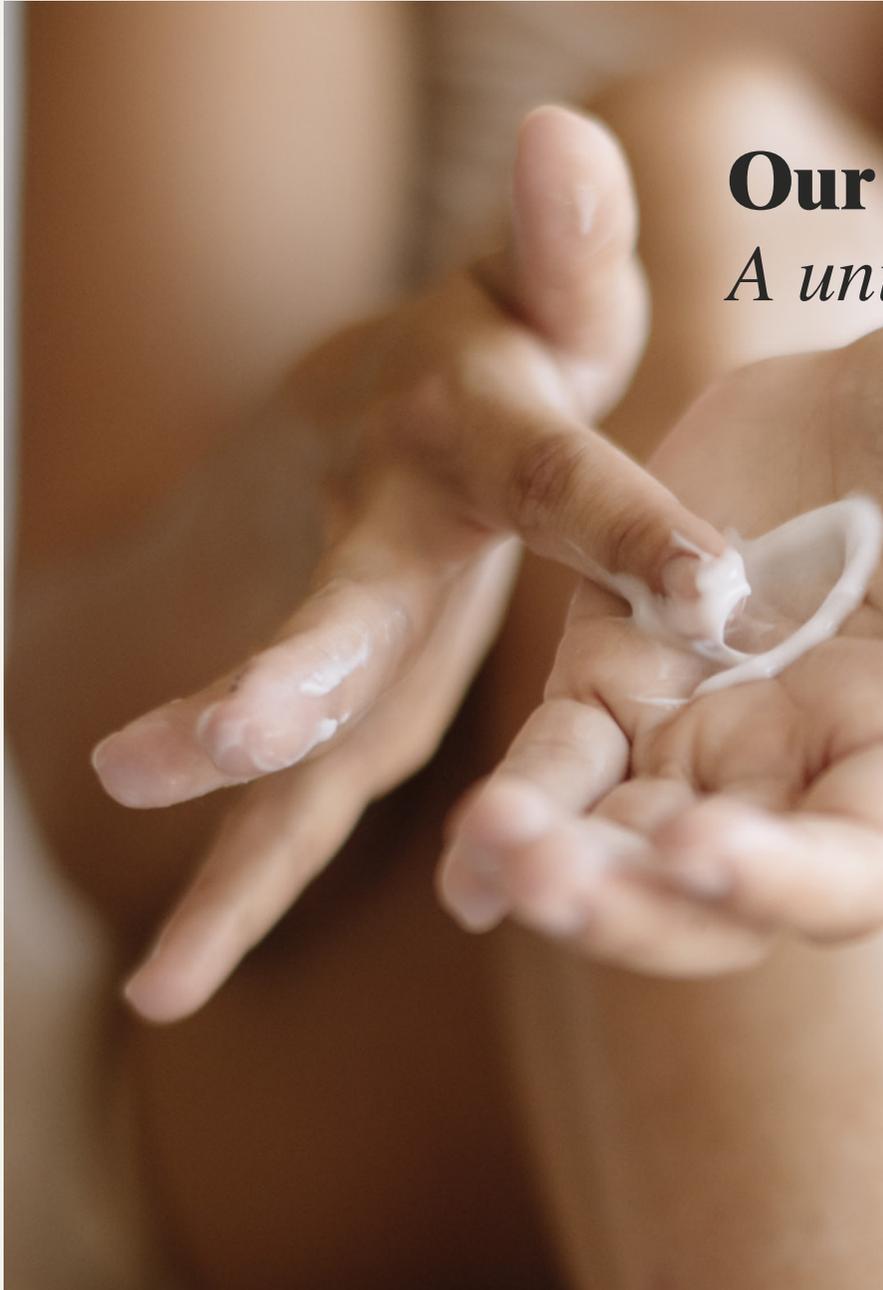

Terpene-free CBD oil for cats

For people and also for dogs, terpenes are healthy molecules that we perceive as aromatic substances. However, the endocannabinoid system and the anatomy of cats and people are very different since cats can't break down terpenes or can only do so after a longer period of time. That's why we recommend products without terpenes and with the appropriate organic quality for long-term treatments in cats.

Benefits for pets

CBD is believed to have many therapeutic properties, but unlike the other cannabinoid THC (tetrahydrocannabinol), it has no psychoactive effects. Scientific studies looking at CBD have shown that CBD can have a positive effect on pets, helping with pain, loss of appetite, inflammation, and epilepsy. Healthy pets can also benefit from the effects of CBD: anxiety and aggression can decrease, eating behavior can improve, and the pet will benefit from healthy digestion and a shiny coat.

Our CBD cosmetic products

A unique combination

Our latest developments in cosmetics are based on a unique clinical formula we have developed exclusively to address the skin's needs – immediately and permanently. We combine two special, pure active ingredients: aloe vera and our hemp extract – with all the ingredients rich in vitamins and minerals that can reach the deeper skin layers.

CBD

Packed with antioxidants, CBD helps reduce the visible signs of ageing by counteracting free radical damage and reducing inflammation. This can visibly reduce wrinkles, skin fatigue and reddening while balancing out negative environmental influences and stress, making the skin experience true harmony.

Aloe vera

Aloe vera is rich in polysaccharides, enzymes, and vitamins A and C. Thanks to its anti-inflammatory properties, it can create a protective barrier on the skin. The abundance of antioxidants can help improve the skin's natural firmness and keep it hydrated. In addition to having antibacterial properties, aloe vera also contains salicylic acid that helps exfoliate the skin, preventing the formation of dark spots. Aloe can also stimulate fibroblast activity, causing an increase in collagen production and elastin fibers that make the skin less wrinkly and more elastic.

CBD & aloe face cream

Day & night cell protection

Protective and regenerating

A unique combination of our Swiss hemp extract & aloe vera naturally nourishes the skin every day, protecting against irritating environmental influences such as UV light, fine dust or stress. We combine the active ingredients of the two plants with moisturizing sodium hyaluronate to build up collagen, and with vitamin E for radiant skin. Regenerates overnight, protects and restores during the day.

Inhalt	Cannabidiol	WL	Alpinols Essential
50ml	87mg	A000245	A000022 (DE)

More hydration for the skin

Sodium hyaluronate is a derivative of hyaluronic acid. More precisely, it's a salt form of hyaluronic acid. Compared to hyaluronic acid, it has a lower molecular weight, which allows it to reach into the deeper skin layers. This active ingredient not only moisturizes the skin but can also make it plump, reduce wrinkles, and give it a refreshed appearance.

CBD, aloe & hyaluronic serum

With an immediate effect

Revitalizing & invigorating

The rich, oil-free serum has an immediate revitalizing effect, ensuring naturally fresh radiance. Combined in a unique formula from Switzerland, hyaluronic acid and vitamin C invigorate the tired and stressed skin. Thanks to its oil-free consistency, the serum absorbs quickly, works for all skin types and is a great addition to daily skin care.

Inhalt	Cannabidiol	WL	Alpinols Booster
30ml	52.5mg	A000253	A000013 (DE)

What is hyaluronic acid?

Hyaluronic acid is a polysaccharide that can absorb up to 1,000 times its weight in water. As we age, the level of this acid in our bodies decreases, which can lead to drier, more wrinkle-prone skin. In our ALPINOLS The Booster, hyaluronic acid works on the skin's surface to attract water, keeping the skin hydrated, smooth and plump.

CBD & aloe sport gel

Effective regeneration

Regenerating & cooling

The muscle gel benefits from the unique synergy of aloe vera and CBD, which combines analgesic and anti-inflammatory properties. Thanks to its cooling effect, it provides immediate relief while promoting cartilage formation and muscle regeneration. The oil-free gel absorbs quickly into the skin, strengthening the connective tissue and ligaments.

Inhalt	Cannabidiol	WL	Alpinols Active
100ml	175mg	A000251	A000007 (DE)

Glucosamine: *builds cartilage and regenerates*

Glucosamine is a naturally occurring amino sugar. In the human body, it's a component of connective tissue, cartilage, and synovial fluid. As a cartilage-building material, glucosamine sulfate works best for the regeneration of heavily stressed muscles and joints after intense physical exertion.

CBD & organic jojoba Massage oil

For moments of tranquility

The soothing combination of premium organic jojoba and CBD offers the rich, pampering, relaxing active ingredients of ALPINOLS The Dreamer massage oil that's gently massaged into the skin, creating a feeling of complete relaxation throughout the body. The healthy terpenes from the Full-Spectrum hemp extract are also used for aromatherapy.

Inhalt	Cannabidiol	WL	Alpinols Dreamer
100ml	230mg	A000248	A000016 (DE)
250ml	575mg	A000249	A000019 (DE)

Jojoba oil: *hydration without residue*

Due to its special natural composition, jojoba provides rich hydration without leaving a greasy shine. It also regenerates damaged skin, for example after sunbathing. Thanks to vitamin E, it creates a protective layer on the skin and, together with the CBD, can reach into the deeper skin layers, stimulating cell renewal and creating a longer-lasting feeling of calmness and relaxation.

Everything under one roof

From farming to production to distribution

25 years in organic farming

We've been growing hemp in our fields and greenhouse near Fribourg (Switzerland), using only the purest organic methods, for over 15 years. We harvest by hand and according to the strict Bio Suisse certification guidelines.

Handpicked harvesting

During the annual harvest, the entire team rolls up their sleeves and joins in to ensure that the hemp plants are gently harvested from the fields. The plants are then neatly separated, dried, and prepared for extraction.

Gentle CO₂ & THC extraction

Our extracts and cannabinoids are produced in-house, just a few steps away from our fields. The natural and environmentally friendly CO₂ extraction takes place without heat to avoid the destruction of valuable cannabinoids, terpenes and flavonoids. For the Broad Spectrum, we extract THC using flash chromatography.

Everything under one roof

*From farming to
production to distribution*

Independent quality assurance

Trust and transparency are our top priorities. We analyze each batch in our in-house laboratory while sending a sample to a certified, independent laboratory at the same time. All analyses are also available online.

Everything under one roof

We even do the bottling in-house. This gives us full transparency in and control over every production step.

Worldwide distribution

Our end products are exported to our EU warehouse, from where they can be shipped directly to your doorstep—anywhere in the world.
